ABOUT

Frontend Developer with over 4 years of commercial experience. Deep expertise in JavaScript, TypeScript, React, and Next.js. Specializes in architecting complex interfaces (Next.js/React), performance optimization (Core Web Vitals), and Headless CMS integration. Regularly conducts performance audits (Lighthouse, Core Web Vitals), updates dependencies, tracks security patches, and implements modern development practices.

WORK EXPERIENCE

Frontend Developer Nineseven

September 2024 - September 2026

Developed high-load corporate admin panels and multilingual e-commerce sites. Responsible for the full frontend development lifecycle, from architecture design to performance optimization, UI library creation, and security implementation

- Designed and developed several high-load web applications with a focus on loading speed
- Developed and maintained automated tests for critical scenarios
- Implemented and evolved a corporate UI library (dependency management, versioning)
- Adapted an e-commerce template into a React Native mobile application (touch handling, mobile screens)
- Designed and implemented a product configurator with dynamic attribute settings, dependent option logic, and automatic price recalculation
- Optimized handling of large data objects: implemented memoization, list virtualization, and lazy loading
- Integrated client-side payment systems
- Optimized the bundle: code splitting, dependency analysis using Bundle Analyzer
- Implemented web analytics systems (Google Analytics, Yandex.Metrica)
- Maintained technical project documentation: README, JSDoc, setup and launch guides
- Used AI assistants (Cursor) for automatic dependency updates, refactoring, and code synchronization in micro-frontend projects

Achievements:

- Optimized rendering through component caching and Streaming SSR, achieving consistent Core Web Vitals pass rates across all device types
- Implemented multi-layered form protection (Rate Limiting + reCAPTCHA), completely blocking automated spam
- Integrated authentication via a corporate OAuth service

Technologies: TypeScript, React, Next, Vue, Nuxt, React Native, Redux Toolkit, Next Auth, Next Intl, Zustand, Shadcn, Tailwind CSS, Node.js, Express, PHP, Laravel, Vitest, Jest, Playwright, Storybook, Lighthouse.

Full-Stack Developer Web-Space

November 2023 - September 2024

Developed full-stack web applications using Next.js with a modern tech stack (React, Redux, MobX, Tailwind CSS). Configured project deployment on Vercel using Docker and GitHub Actions. Created reusable UI components, admin panels, and interactive interfaces with animations

- Developed both frontend and backend parts of applications using Next.js (App Router, Route Handlers, API)
- Created and maintained a UI kit for each project
- Developed admin panels using Ant Design
- Implemented interactive elements with animations (GSAP, Framer Motion)
- Implemented custom animations based on mathematical formulas using requestAnimationFrame and Canvas
- Configured rendering strategies (SSG, ISR, SSR, dynamic imports, dynamic routes)
- Implemented state management using Redux and MobX (shopping cart, calculations, payments)
- Implemented integration with Telegram Bot API for sending notifications

Achievements:

- Configured automatic Next.js cache invalidation via WordPress webhooks (Headless): when content is updated in the admin panel, the cache is rebuilt incrementally (ISR), updating only the changed pages

Achievements:

- Integrated a payment system with WebSocket-based payment processing, ensuring instant transaction status updates without page reloads
- Implemented automatic generation of PDF certificates with dynamic data and email delivery via Nodemailer

Technologies: TypeScript, React, Next, WordPress, Redux Toolkit, Zustand, Tailwind CSS, Framer Motion, Lighthouse.

Full-Stack Developer Freelance

November 2022 - November 2023

Developed commercial projects from scratch on a turnkey basis: from architecture to deployment. Integrated payment systems, Headless CMS, and analytics systems for conversion tracking

- Developed web applications from scratch
- Integrated payment systems and CMS
- Optimized performance (refactoring, Virtual DOM)
- Wrote unit tests (Jest), configured deployment and hosting

Achievement:

- Implemented a testing system for an educational platform supporting various question types, answer validation, passing score calculation, and real-time result display

Technologies: TypeScript, React, Next, WordPress, Redux Toolkit, Zustand, Tailwind CSS, Framer Motion, Lighthouse.

Frontend Developer Aheadworks

April 2022 - November 2022

Developed web applications within the Shopify ecosystem using Shopify Polaris. Worked on creating a content management system, developing tracking modules, and multilingual solutions

- Developed interfaces for Shopify applications using Shopify Polaris UI
- Implemented a product tracking system with data analysis and chart visualization
- Developed multilingual applications with a subscription system

Achievement:

- Designed the architecture of a Page Builder for a Shopify application with a custom block system, global state management via Redux, and full multilingual support (i18n) for stores in different regions

Technologies: TypeScript, React, Mobx, Shopify, Redux, i18n, PHP, Laravel.

SKILLS

Frontend	TypeScript, JavaScript (ES6+), React, Next.js, Vue, Nuxt, Redux Toolkit, Zustand, MobX, Framer Motion, React Native, Hooks, Context API
Markup	HTML5, CSS3, SCSS/SASS, BEM, Responsive Design, Cross-browser layout, Tailwind CSS, Figma
Performance	Lighthouse, Web Vitals (LCP/FCP/CLS), lazy loading, Webpack, Vite
Testing	Jest, Vitest, Storybook, React Testing Library
Tooling	Git, GitLab, ESLint, Prettier, Docker, CI/CD, Vercel
Backend	Node.js, PHP, Laravel, REST API, PostgreSQL, Python, Django, WordPress (Headless CMS)
Other	SSR, CSR, SPA, PPR (Partial Prerendering), Streaming, Sentry

EDUCATION

Belarusian State Technological University • Minsk • 2018-2022

Programmer-Designer, Design Of Electronic And Web Publications

LANGUAGES

Russian - C2 (Native)

English - B1 (Intermediate)
